Perfect Image Printing Installs Six-Color 28” Komori Lithrone Press

Perfect Image Printing Increases Productivity by 30 Percent and Cuts Overtime Press Hours in Half with Lithrone NL628

Rolling Meadows, IL, February XX, 2008—Komori America Corporation, a premier manufacturer of sheetfed and web offset printing presses, today announced that Perfect Image Printing based in Marietta, GA, has installed a six-color, 28” Lithrone sheetfed offset press with aqueous coater (NL628C). The installation of the NL628C with its up-to-the-minute technology represented the company’s latest investment to stay in step with market demands. The six-color Lithrone replaces a five-color Komori that Perfect Image had been operating for more than 20 years. Since installing the new press, the company has seen a 30 percent increase in productivity with the new press and has reduced overtime press hours by 50 percent.

Perfect Image Printing produces high-quality business-to-business marketing materials and specialties like hand assembly and kit packing for discerning clients that include Fortune 500 corporations, mid-sized businesses, and not-for-profit agencies. In the past three and a half years, the company has added variable data printing capabilities, along with major upgrades to its bindery operations. The NL628 complements these investments by offering compatibility with most advanced digital systems and a whole host of labor saving features that allow for greater productivity and profitability.

“The JDF workflow technology, linking our prepress and pressroom was new for us, but the training and support we received from Komori was excellent. Komori has always been

very easy to do business with and everyone operates with professionalism and integrity,” said Ira Jackson, president of Perfect Image Printing. “The advanced technology and superior print quality of the NL628 give us the cutting-edge capabilities we need to sell our services with great confidence.”

“Perfect Image Printing’s continued emphasis on the application of technology to ensure customer needs are met makes the Lithrone a logical choice,” said Mark Hopkins, regional sales manager for Komori. “We’re happy to be able to assist in the continuing success of Perfect Image Printing with the technology, training, and support needed to get the most out of this high-performance press.

About Komori America Corporation

Tokyo-based Komori Corporation, a premier manufacturer of sheetfed and web offset printing presses, provides world class technology especially suited for today’s highly competitive printing marketplace. Delivering the highest level in print quality coupled with impressively fast makeready and JDF connectivity through open systems architecture, Komori presses help printers achieve higher productivity levels essential for increased margins and business growth. Komori America Corporation is headquartered in Rolling Meadows, IL and manages a sales and service organization throughout North America.
